PROFESSIONAL SUMMARY

Software Developer with experience in building frontend applications using ReactJS and backend services using Python (Flask) and MySQL. Worked as a full-stack developer, handling API development, integration, and delivering complete web solutions.

TECHNICAL SKILLS

Languages: JavaScript, Java, Python (learning), SQL

Frameworks & Libraries: ReactJS, Node.js, Express.js, Flask, MaterialUi, Bootstarp

Databases: MySQL, MongoDB (Atlas)

Tools & Platforms: VS Code, Git, GitHub, GitLab, Postman, Eclipse, MySQL Workbench

WORK EXPERIENCE

Software Developer - Atraya Technologies

April 2025 - Present

- Worked on frontend development using ReactJS to build responsive and interactive web applications.
- Integrated backend services by consuming REST APIs for dynamic data handling and real-time updates.
- Learning and implementing Python & Flask for new backend services.
- Using Git, GitLab, and Postman for version control and API testing.

Web developer - InternPe

August 2024 – September 2024 | Remote

Web developer - Oasis Infobyte

September 2024 – October 2024 | Remote

PROJECTS

HRMS Web Application (Client Project)

Role: Full-Stack Developer

Tech Used: ReactJS, Material UI, Python (Flask), MySQL

- Developed frontend using ReactJS with Material UI for a responsive and user-friendly UI.
- Designed and implemented Flask-based backend APIs for managing employee data, attendance, leave, and role-based access.
- Used MySQL as the database for securely storing user and employee records
- Integrated secure login, user roles, and CRUD operations for employee management.

- Handled complete frontend-backend integration, authentication, and dynamic data rendering.

Electricity Management System (Client Project)

Role: Full-Stack Developer

Tech Used: Vite + React, TailwindCSS, Python (Flask), MySQL

- Built a web application for prepaid billing and grievance management with role-based access control.
 - Developed an admin dashboard for managing master data and user roles with optimised UI using Vite + React + TailwindCSS.
 - Integrated Razorpay payment gateway for prepaid electricity bill payments and enabled thermal printer bill generation.
 - Designed and optimised MySQL tables to store prepaid details and integrated meter APIs so users can track consumption and make payments online.
 - Delivered scalable, secure, and responsive solution ensuring real-time data updates across roles.
-

PERSONAL PROJECTS

iNotebook (MERN Stack)

Full-stack notes app with JWT authentication, password hashing (bcrypt), and MongoDB integration. Users can securely create, update, delete, and view notes after login.

Flask CRUD API

Developed RESTful APIs using Flask and MySQL for managing student records. Implemented all CRUD operations and tested with Thunder Client.

TextUtil (ReactJS)

React-based tool for text transformation, live preview, dark/light mode, and word count. Showcases state, props, and component architecture.

ACADEMIC QUALIFICATION

- 10th(2015) with aggregate 73.60% from Saint Rita's high school, Kunigal
 - Diploma in Civil Engineering(2019) with aggregate 51% from S J B G S Polytechnic B G Nagara, Nagamangala
 - B.E in Civil Engineering(2023) with aggregate 7.01 CGPA from East West Institute of Technology Magadi road, Bengaluru
-

DECLARATION

I hereby declare that the above information is true to the best of my knowledge and belief.
